

HEALTHCARE EVAC AID

- ❗ How will everyone escape?
- ❗ Have you planned your escape route?
- ❗ Does all of your evacuation equipment work?
- ❗ Will people know how to use it?
- ❗ Can people escape safely, even at night?

Healthcare Evac Aids are evacuation equipment designed to assist caregivers moving patients to safety in the event of fire evacuation. Our range of evacuation equipment has been designed with comfort and safety in mind to reduce the risk of injury to caregivers and the individual being evacuated. It is essential that caregivers are properly trained in the use of the equipment for the safe movement of individuals during emergency evacuation. The equipment are use in hospitals, care homes, hospices, schools, universities and any other public or private building.
